Recommendation check V1 → V2

Each recommendation from the V1 report checked against the founder's revised deck, with the slides behind every verdict. Your programme team decides what to discuss in the next session.

Materials	Illustrative sample: Keepslot, a fictional startup, deck V1 and deck V2.
Founder	Laura Méndez (fictional)
Version	**2 of 3**
Stage	Before the next session

01 V1 recommendation	02 Evidence in V2	03 Verdict
Reconcile the revenue figures and show who pays PDF Deck V1 · slide 8	Slide 9 shows MRR €1,191 (6 × €149 + 3 paid pilots × €99), run-rate ARR ≈ €14.3k and signed LOIs of €42.9k shown separately. PDF Deck V2 · slides 8 and 9	Fixed
Quantify the cost of a no-show for one clinic PDF Deck V1 · slide 3	Slide 4 adds a cost per missed appointment, but not what no-shows cost one clinic in a month. PDF Deck V2 · slide 4	Partially fixed
Size the market bottom-up from a beachhead PDF Deck V1 · slide 6	Slide 6 still shows only a top-down market figure; no beachhead segment is named. PDF Deck V2 · slide 6	Not fixed · To discuss

SOURCE EXCERPTS · THE VERDICT IN ROW 1

PDF Deck V1 · slide 8

"The traction slide claims €42k ARR, but 9 clinics × €149 × 12 = €16.1k."

PDF Deck V2 · slide 9

"MRR €1,191 (6 × €149 + 3 paid pilots × €99), run-rate ARR ≈ €14.3k; signed LOIs of €42.9k shown separately."

WHY IT MATTERS

The next session starts from what changed since V1, not from a fresh read of the whole deck. The partial and open items are the agenda.

YOUR TEAM'S NEXT QUESTION

How does Keepslot compare with the reminders clinics already have in their software?

PROGRAMME DECISIONS STAY WITH YOUR TEAM

An improved deck does not establish business performance. Your team checks the evidence and decides what to ask next.

- [ ] Discuss the partial fix in the next session
- [ ] Ask for the no-show cost per clinic
- [ ] Next steps agreed by your programme team
